WORK EXPERIENCE

Leaflink   **Apr 2022 – Dec 2022**
Frontend Engineer   *New York, NY*

- Wrote performant, maintainable, self-documenting, test-driven frontend code utilizing Vue and TypeScript.
- Collaborated daily with a cross-functional web development team consisting of product managers, designers, QA analysts, and software engineers.
- Delivered work consistently before the sprint ended, taking on necessary tech debt work to improve the codebase and gaining experience through the modernization of existing components and the addition of test coverage.
- Re-allocated time each day to review open pull requests spanning all engineering teams to provide high-quality code reviews.
- Contributed to bi-weekly front-end engineer syncs with over 85% of the company's front-end engineers to help improve tech debt and code cleanliness.

Stuller, Inc   **Nov 2020 – Apr 2022**
Frontend Engineer II   *Lafayette, LA*

- Engineered features in React that use responsive web design principles for mobile and desktop platforms to improve UX for a jewelry-distributing site that reaches countries worldwide.
- Learned in a fast-paced environment with an experienced web development team, while consistently achieving company-driven deadlines.
- Presented at monthly meetings consisting of over 100 people about the team's goals and expectations.
- Converted thousands of lines of legacy code to more modern frameworks like React and Vue using TypeScript and JavaScript.
- Launched over 75 reusable components in a headless CMS to allow staff to build custom brand sites.
- Established and coordinated monthly check-in meetings to ensure workplace positivity and individual growth for all members of the software engineering team.

Gemvision Corporation   **Jun 2019 – Apr 2020**
Software Engineer   *Lafayette, LA*

- Demonstrated flexibility while gaining web development experience with JavaScript, Node, React, React-Native, Typescript, Redux, and Serverless.
- Spearheaded an iOS app, working as an independent software engineer that generated the ability for over 30% of customers to track product shipments and rewards.
- Implemented serverless applications with a small web development team using AWS Lambdas to communicate with front-end applications.
- Restructured an application for admin usage of administering application licenses.
- Pioneered an Electron application that allowed users to handle cloud-based storage, read company news, and launch license-based applications.

EDUCATION

Academy of Interactive Entertainment   **2016 – 2018**
Associate's degree, Computer Science   *Lafayette, LA*
